

Severe Weather Conditions:

In the event of snow or other severe weather conditions, staff and students should assume that school will open as usual. However an assessment will be made on a daily basis by 7.15 am with regards to possible closures.

This information will be conveyed on the website by 7.15 am and on the school telephone system (choose the option to listen to urgent messages).

Parents should be aware that health and safety considerations may make it necessary to close the school, sometimes before the end of the normal school day. In this event, arrangements can be made for students to be supervised until 3.05 pm provided parents have contacted the school to request this.

In cases of closure, all students should continue their studies at home using the MLE, books, resources and websites such as BBC bitesize and SAM Learning.

Important information to all students taking public examinations: All public examinations will take place as scheduled and will not be affected by any weather conditions. Students must make provision to ensure their attendance at these important examinations.

Thank you to all students and parents for your co-operation and understanding.
