

# **Assessment evidence for Year 11 and Year 13 courses**

A full list of the evidence on which grades will  
be based for Summer 2021

## Important information

This summary is provided for the students and families of students in Year 11 and Year 13 to share the details of assessment evidence that will be used for subject awards in Summer 2021. In accordance with [guidance from Ofqual](#), these assessments have been selected by curriculum areas to fulfil the following criteria:

- Representative of what classes have been taught during the course
- Assessing as broad a range as possible of taught content
- Making use of non-examined assessments (coursework) in subjects where this is appropriate
- Consistently applied for the whole cohort and making provision for exceptional circumstances where required

From these pieces of evidence, teachers will use their professional judgement to align the evidence within each student's portfolio with the published performance standards set out in the [Joint Council for Qualifications \(JCQ\) grade descriptors for GCSE and A level](#), in line with our Centre Policy. It is important for students to note that in some cases they may not have completed all the evidence sources listed. Where there is a valid reason for this, teachers will have taken account to ensure that students are not disadvantaged. Our Centre Policy covers all aspects of assessment provision including our approaches to objectivity, quality assurance and minimising bias. It is available on the UHS website [here](#).

Should you have any questions relating to evidence used, please contact the school office on [office@uhs.org.uk](mailto:office@uhs.org.uk) who will direct you to the appropriate person.
